Professionals – Mid-Michigan Chapter**

Confined Spaces / Permit Required Confined Spaces

Course Description:

This course offers a concise overview of Confined Spaces and Permit-Required Confined Spaces (PRCS), highlighting their importance in workplace safety and OSHA compliance. Participants will explore the unique risks associated with these environments and learn best practices for ensuring safe operations in a variety of workplace settings.

Learning Objectives:

1. Define Confined Space/PRCS and explain its purpose in workplace safety and compliance.
2. Identify and describe the differences of Confined Space/PRCS as established by the OSHA regulations.
3. Recognize common workplace hazards that may be present on jobsites(all industries) that may contain confined spaces/PRCS.
4. Apply the Confined Space/PRCS OSHA standard to real-world scenarios to determine employer responsibilities and take appropriate actions for hazard elimination.

Phil Weinstein has over 28 years of experience in safety and industrial hygiene. His career started in Hazardous Waste Management, then Industrial Hygiene, moving into OSHA safety compliance. This included equipment operation, confined space and other OSHA program management. Phil is the owner of Weinstein Safety Consulting which provides full-service safety services to various manufactures and environmental remediation companies. Phil is proud to have earned a Master's degree in Toxicology and hold the Certified Safety Professional designation.
